Seven names, one uneven obol.

Selected entry: 100 drachmas. IG I³ 476, lines 235–242. This document includes your allocation and the edited record, even if you had not yet revealed it in the activity.

Divide the total. Then read the record.

Six obols make one drachma. 600 obols divided among seven names gives 14 dr. 1 ob. each, with 5 obols left over. This activity permits one extra whole obol per name. 21 distributions balance that total within these rules.

The seven names

Simias Σιμίας

Living in Alopeke. The residence formula identifies where he lives. This entry does not call him an Athenian citizen.

IG lines 236–237: 14 dr. 2 ob.

14 drachmas × 6 + 2 obols = 86 obols.

Name 1 in the selected team; this order does not assign individual flutes to people.

Kerdon Κέρδον

No further identifier here. A name alone does not establish legal status. Keep Kerdon’s status unspecified in this excerpt.

IG lines 237–238: 14 dr. 2 ob.

14 drachmas × 6 + 2 obols = 86 obols.

Name 2 in the selected team; this order does not assign individual flutes to people.

Sindron Σίνδρον

Of Simias; interpreted as enslaved. The possessive name is interpreted as an enslaved worker’s owner, rather than a father, in the current IG and AIO readings. The Greek does not spell out a word for ‘slave’ here.

IG lines 238–239: 14 dr. 2 ob.

14 drachmas × 6 + 2 obols = 86 obols.

Name 3 in the selected team; this order does not assign individual flutes to people.

Sokles Σοκλῆς

Of Axiopeithes; interpreted as enslaved. The owner named for Sokles is Axiopeithes, not Simias. An amount recorded beside his name does not tell us who took possession of the payment.

IG lines 239–240: 14 dr. 2 ob.

14 drachmas × 6 + 2 obols = 86 obols.

Name 4 in the selected team; this order does not assign individual flutes to people.

Sannion Σαννίον

Of Simias; interpreted as enslaved. The possessive identifier links Sannion with Simias. The record gives a payment entry, without reporting working hours, personal receipt or living conditions.

IG lines 240: 14 dr. 2 ob.

14 drachmas × 6 + 2 obols = 86 obols.

Name 5 in the selected team; this order does not assign individual flutes to people.

Epieikes Ἐπιείκες

Of Simias; interpreted as enslaved. Epieikes's second amount is one obol below the first five entries. That small difference is compatible with dividing a total into whole obols; the inscription gives no reason for the choice.

IG lines 240–241: 14 dr. 1 ob.

14 drachmas × 6 + 1 obols = 85 obols.

Name 6 in the selected team; this order does not assign individual flutes to people.

Sosandros Σόσανδρος

Of Simias in the first entry; interpreted as enslaved. The first entry supplies the possessive 'of Simias'. The second repeats the name without that identifier. Keep the two entries visible rather than silently inserting words into the second.

IG lines 241–242: 14 dr. 1 ob.

14 drachmas × 6 + 1 obols = 85 obols.

Name 7 in the selected team; this order does not assign individual flutes to people.

Read four working words

Reading aids join words split across lines and use ordinary Unicode Greek. They retain selected older Attic spellings; οἰκῶν and Σοκλῆς show long vowels in the later alphabet. They are not a diplomatic transcription. The licensed XML and scanned pages retain the edition's restoration brackets.

ῥαβδόσεος

rhabdoseos · for fluting. A genitive of ῥάβδωσις, the cutting of vertical channels. The older spelling corresponds to later ῥαβδώσεως. The heading appears at IG line 192, above the first selected entry.

οἰκῶν

oikōn · living, residing. A present participle modifying Simias: 'living in Alopeke'. This reading aid uses ω; the stone's older Attic alphabet writes O for this sound. Residence is not a statement of citizenship.

Σιμίο

Simio · of Simias. A possessive genitive after a worker's name. Its old Attic ending -o corresponds to later -ου. Modern editors interpret this identifier as ownership here. It is not a separately written word meaning 'enslaved'.

ἐχσῆς

hechsēs · next in sequence. The source's older spelling corresponds to later ἑξῆς. With 'the next [column]', it orders the work entries. It does not divide particular flutes among the named workers.

What the account can establish

These are two selected entries for column-fluting work in the Erechtheion accounts, 408/7 BCE, not a complete building budget or a daily wage table. The totals 90 and 100 drachmas are sums of the edited individual amounts. Equal division with whole-obol adjustments is a modern arithmetic comparison; it does not establish the ancient accountant's intention. No amount is converted into modern money. A payment entered beside an enslaved worker's name does not establish that the worker personally received or controlled it.

Parts of names and numeral signs are restored by editors. The exact sums are exact arithmetic on that edited reading, rather than proof that every sign survives. The current IG and AIO ownership interpretation takes precedence over Caskey's 1927 English translation, which

renders possessive identifiers as family relationships. No modern AIO translation is reproduced here.

The 1927 p. 412 table interprets repeated work stages and distinguishes preserved from restored totals. Its proposed complete-column cost is not used as a measured total or as the budget for this activity.

Ninth prytany. XVII, col. II, ll. 46–69: payments of 110 drachmae each for work on columns I, II, III, VI; of 60 drachmae for work on column IV.

These accounts are introduced by the phrase, *ῥαβδόσεος τῶν κιόνον τῶν πρὸς ἕο, τῶν κατὰ (παρὰ) τὸν βομόν*, and the six columns are designated according to their relative proximity to an altar of Dione, which apparently stood near one end of the East Portico, e.g., *τὸν τρίτον ἀπὸ τῶ βομῶ τῆς Διόνες; τὸν ἐχόμενον ἐχσῆς; τὸν πρὸς τῶ βομῶ τῆς Διόνες; τὸν ἕκτον κίονα ἀπὸ τῶ βομῶ τῆς Διόνες.* In the eighth prytany two separate operations on columns III–VI are recorded, and a third operation on columns I–IV and VI in the ninth prytany. It is noteworthy that the three operations on each column are performed by one and the same group of workmen, and that consequently we have six groups of names, one for each column. These same groups appear in inscription XIV, assigned to the same columns as in inscription XVII, a fact which in itself would show that the work in the seventh prytany was on the columns of the East Portico. This is, moreover, confirmed by the restoration of *ἀπὸ τῶ βομῶ τ[ῆς Διόνε]ς* in line 8. The work of channelling the east columns was thus divided into at least four separate operations costing 50, 90, 100, 110 drachmae respectively. It is not likely that there were more than four operations. The items in the inscriptions may be conveniently arranged in a table, as follows, the payments actually recorded in the extant portions or restored with certainty being printed in heavy-faced type:

Column	Workmen	PRYTANIES							Total
		Sixth	Seventh		Eighth		Ninth	Tenth	
I	5 men, Laossos, etc.	. .	50	90	. .	**100**	**110**	. .	350 dr.
II	5 men, Phalakros, etc.	. .	50	90	. .	**100**	**110**	. .	350 dr.
III	5 men, Ameiniades, etc.	. .	**50**	. .	**90**	**100**	**110**	. .	350 dr.
IV	7 men, Simias, etc.	. .	**50**	. .	**90**	**100**	**60**	50	350 dr.
V	6 men, Onesimos, etc.	50	. .	90	**100**	**110**	. .	. .	350 dr.
VI	6 men, Theugenes, etc.	. .	**50**	. .	**90**	100	**110**	. .	350 dr.

It is natural that each operation should take more time, and consequently be more costly than the one preceding it, and that the first operation — the preliminary chiselling down of the rough envelope of marble — should take considerably less time than the actual carving and smoothing of the fillets and channels.

In XIII, col. I, l. 14, we have the record of the removal of the scaffolding from the North Portico, suggesting that the channelling of its columns had been completed in the sixth prytany. It is probable that the same thirty-four masons who channelled the east columns had previously been employed on those of the North Portico, and that the work on the second
